Dux Raymond Sy Helps Project Managers “Think Outside the Box” at the PMI New Jersey Regional Symposium

Innovative-e, Inc. managing partner, Dux Raymond Sy, will share strategies for leveraging SharePoint for project management success at the “Outside the Box Project Management” PMI New Jersey Chapter Regional Symposium.

ATLANTA — Author and SharePoint expert, Dux Raymond Sy, has been invited to speak at the “Outside the Box Project Management” PMI New Jersey Chapter Regional Symposium, which will take place May 4, 2009 at the Pines Manor in Edison, New Jersey. Sy is a managing partner for Innovative-e, Inc., a U.S.-based business technology consulting and services company that helps clients gain competitive advantage through high-performance strategies.

The symposium will feature multiple speakers sharing practical strategies to help project managers create value for organizations, develop sustainable competitive advantages, motivate team members, earn stakeholders’ buy-in on important project decisions, solve complex problems for customers, and secure project financing.

During the symposium, Dux Raymond Sy will share “7 Ways to Leverage SharePoint for Project Management Success.” Attendees will acquire the practical knowledge of how SharePoint, a web-based collaboration technology, can address common project management challenges, such as inefficient communication among stakeholders, poor document management practices and undefined project collaboration standards that can compromise project success. SharePoint provides a framework that can empower project managers to create a standards-based project management information system (PMIS). By the end of the presentation, participants will be able to identify the benefits of leveraging SharePoint as a PMIS, quantify the advantages of using SharePoint as a PMIS compared to other tools and enhance project team collaboration and communication with SharePoint.

With nearly 20 years of experience in the IT industry, Sy is a leading expert on project management and SharePoint solutions. He is a certified project management professional, as well as the author of *SharePoint for Project Management: How to Create a Project Management Information System (PMIS) with SharePoint*. Sy is also an instructor and course author for Learning Tree where he provides in-depth IT training for professionals at leading companies around the world.
